November 2011

To Whom it may concern,

Our company carry out various type of work from new build, refurbishment, listed building upgrade, fit out, repair and maintenance. Our clients include local authorities, Transport for London, various train and bus operating companies and private architects. To help achieve repeat business with our valued clients we operate a registered trade data base for all our operatives. We vet all our operatives and sub contractors for competency in health and safety, we monitor and score workmanship quality, we ensure our operatives have personal insurance and we monitor customer feedback on our trades.

We are happy to confirm Brian Crowe scores highly in our records year on year. Brian has worked for our company on a contract by contract basis, as available for the past 14 years.

The projects we tend to select Brian for are mainly

- High end decorations works
- Work within occupied premises (Residential or commerical)
- Flexibility with working hours (Some projects are out of hours or weekends)

Brians character is such that he can be trusted to be the face of H A Marks on the decorations work he undertakes. He has excellent communication skills which make him ideal for working in occupied residential schemes. He acts as our tenant liaison in such situations.

Recent projects Brian has carried out for H A Marks include

Windsor House, Victoria, London (September 2011)- Communal decoration works to all floors of an occupied office building in Victoria London. Brian and his team worked nights and weekend when the office staff were off. The building is a 17 storey building accommodating Transport for London staff. Brian's arranged the security arrangements and implementation of the work plans and liased directly with the building manager.

Potters Association of Britian (August 2010). Brian carried out the decorations of this high end fit retail and showroom opposite the British Museum in central London.

If we can be our any more assistance please contact the writer.

Yours Faithfully
